SlipCheck

slip resistance testing - slip injury prevention

*MANY FLOORS ARE NOT SUITED FOR THEIR PURPOSE,
GET TO KNOW YOUR FLOORS*

The Health and Safety Authority say

- Conduct workplace specific slips, trips and falls risk assessments
- Include slips, trips and falls in safety statement.
- Conduct audits as required to ensure responsibilities are met.

how safe are your floor surfaces?

Both Wet and Dry

Why Slip Test?

How safe is your floor?

- Accurate and proven dynamic slip test measurements

Reduce the danger of expensive litigation from injury

- Analysis by trained staff

Eliminate false claims

- Test report with results to certified standards

Comply with the Workplace Act

- Fulfill your duty-of-care

Reduced insurance premiums

- Proven and traceable reporting history

Peace of mind

- The most comprehensive 3 to 6 monthly Slip and Trip Safety Audit available.

Slip Check's main objective is to carry out independent objective testing and analysis of floor surfaces.

We provide our clients with the information to make decisions on floor safety and slip prevention, saving them time and money

With 75% of all claims to Shopping Centres arising from slips, trips and falls, this category is becoming an "uninsurable risk". Centre managers have been turning to Slip Check for independent testing and protection against both genuine and false claims.

Up to 50% of all accidents to the Public are Slips and Trips

It is not only Shopping Centres who are vulnerable to these risks, **Transport Terminals, Museums, Catering and Leisure Facilities** all benefit

from the independent Safety Audit and Risk Analysis provided by Slip Check.

Protecting People, Protecting Profits - The Workplace

The HSA estimates that 44% of all Injuries Board Employers Liability awards were for slips, trips and falls (2008), both in public and working environments.

Are you responsible for

- Safety risk assessments*
- Purchasing new flooring*
- Flooring maintenance*
- Cleaning/operations*
- Managing insurance claims*

If you are responsible for any or all of the above - then you will need to test floors and we will be able to help you save time and money

Help keep your area safe for you, your staff and customers

Workplace Regulations stipulate that all floors must not be slippery to pedestrian traffic.

Health & Safety Executive UK Slip Resistance Guidelines

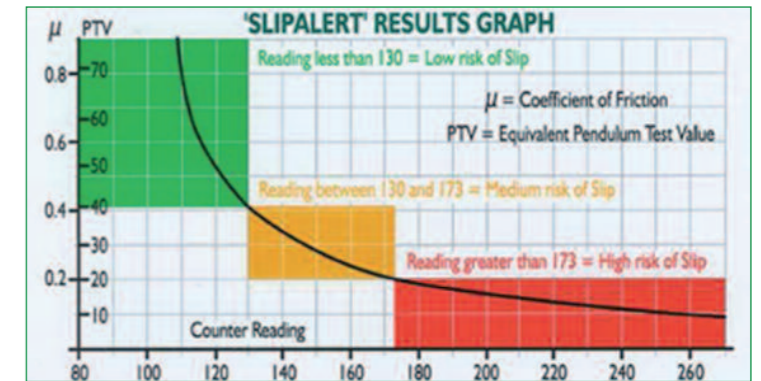

Health & Safety Laboratory UK Slip Resistance Standards BS7976

Use SlipAlert regularly and you can tell if the floor is safe or "an accident waiting to happen".

SlipAlert and the TRL Pendulum are the only recognised units to measure both wet and dry floors. Wet floors are the usual cause of most slips.

Our tests and measurements comply with the following industry standards:

SlipAlert
Floor safety starts here...

shopping centres • food preparation • hospitals • catering • offices

THE SERIOUS QUESTIONS ARE YOU RESPONSIBLE FOR YOUR FLOORS?

- DO YOUR FLOORS MEET THEIR REQUIREMENT AND ARE THEY ARE SUITABLE FOR THE ACTIVITY THAT WILL TAKE PLACE ON THEM?
- ARE YOUR FLOORS SAFE WHEN WET OR CONTAMINATED?
- DO YOUR FLOORS MEET THE REQUIREMENTS YOU REQUESTED FROM YOUR SUPPLIER OR CONTRACTOR? (Not Laboratory tests but on site tests)
- IS THE CORRECT CLEANING AND MAINTENANCE PROCEDURE FOLLOWED? (Have you tested that cleaning keeps your floor safe?)
- DO YOU TEST YOUR FLOORS BEFORE AND AFTER ANY CHANGES? (Painting, polishing, repairs etc.)
- DO YOU AS A PROPERTY OWNER CARRY OUT REGULAR AUDITS AND HAVE PROOF OF DOING SO?

RESPONSIBILITY !!!!!

IF SOMEONE HAS A SLIP ON YOUR FLOORS, YOU ARE RESPONSIBLE UNLESS YOU CAN PROVE OTHERWISE. USE SLIP CHECK AND STOP THAT SLIP !
(Reduce the risk of expensive litigation, eliminate false claims, reduce Insurance premiums and above all get peace of mind)
